

College Student Stress and Well-being Dataset

Dataset Overview

This project utilizes our self-collected "Stress and Well-being Data of College Students" dataset to analyze stress patterns and well-being factors among university students aged 18-21. We have collated this dataset and made it publicly available for research purposes.

Dataset Access:  [Link](#)

Dataset Details

- **Sample Size:** 843 college students
- **Age Range:** 18-21 years
- **Data Collection:** Structured Google Forms survey
- **Features:** 28 attributes covering various stress indicators
